

Contact the Coordinator

Beginning in April 2006, the Thames River Basin Partnership (TRBP) has benefited from a part time coordinator through of a series of three US EPA Clean Water Act section 319 grants and some funding support through the National Fish and Wildlife Foundation as part of the Long Island Sound Study. With the expiration of those funding sources, the position of TRBP Coordinator is suspended. The Eastern Connecticut Conservation District (ECCD), a 501 (c) 3 organization and a core member of the TRBP, will continue to support the organization by committing staff time to schedule meetings and record meeting notes, including the Partners in Action Report. In addition, the ECCD will continue to manage the financial accounts of the Partnership. If additional funding for the TRBP Coordinator position is secured, the Eastern Connecticut Conservation District will reactivate the position and partition their staff time to support the Workplan outlined by the funder. If you know of potential funding sources for future TRBP initiatives, please contact [Jean Pillo](#). If you wish to make a donation to support future Thames River Basin Partnership programs, you may do so by sending your donation to the Eastern Connecticut Conservation District noting that the funds are intended to go towards TRBP programs.
