MEETING AGENDA

Welcome and Introductions!

Special Presentation: In a joint presentation by The Last Green Valley and the Eastern Connecticut Conservation District, a summary of the final outcomes of an NRCS RCPP project entitled Improving Soil Health and Water Quality in the Thames River Watershed will be presented. TLGV was the lead partner in this. This project addressed two national priorities (soil health and water quality), and all five Connecticut state priorities (water quality degradation, soil erosion, soil quality degradation, degraded plant conditions and livestock production limitations). Utilizing the RCPP Program, four collaborating partners implemented soil health conservation practices through EQIP on cropland in eastern Connecticut's Thames River Watershed. Water quality monitoring and technical assistance were also included in the project.
